

Braintrain Solutions – Testing

Career Testing and Counseling

Too many individuals:

- Hop from job to job
- Waste time and money in the wrong career
- Are unhappy, unfulfilled, searching
- Easily led astray

How does one avoid these pitfalls? *BRAINTRAIN* takes a two-fold approach.

First, individuals are tested to determine where their cognitive abilities lie. Unlike other career tests that are interest based, these abilities are then overlaid on the required abilities for any given career. Weaknesses bring into focus any areas which need improvement if success in a given career is desired. Doors are not closed; reality is addressed.

Second, many individuals need direction. Their abilities indicate they can be whatever they want, but they don't know what they want. *BRAINTRAIN*'s staff will help each individual:

- Narrow Interests
- Set Goals
- Identify Personality Type
- Explore Traditional & Non-traditional Career Choices
